Notes for Contributors

The *European Journal of Marketing* prints only articles which have not been previously published elsewhere in English.

COPYRIGHT INFRINGEMENT
Authors submitting articles for publication warrant that the work is not an infringement of any existing copyright and will indemnify the publisher against any breach of such warranty.

EDITORIAL OBJECTIVES
To provide a platform for new ideas in marketing – the thinking, theory and practice – and a forum for debating issues that arise. In this way the journal seeks to:

- facilitate the interchange of information amongst researchers on a worldwide basis.
- assist both Academics and Practitioners to keep up-to-date with developments in marketing.

GENERAL PRINCIPLES

(a) It is our intention to publish well-written, readable articles with broad appeal and a truly international relevance.

(b) Contributors are encouraged to focus on either conceptual or empirical work and to outline practical implications for marketing. Topics should always relate to some aspect of marketing.

(c) New and first-time authors are particularly encouraged.

(d) As the *European Journal of Marketing* we are keen to publish more good papers which emanate from Europe, or focus on Europe in the global context.

ARTICLE LENGTH
Articles should be approximately 4,000 words in length, however shorter articles are welcome.

PRESENTATION

(a) Send your article in typescript with wide margins and double spacing. Send three copies if possible.

(b) A brief autobiographical note should be supplied including full name, appointment and name of organization.

(c) A title page should be supplied including the author's name. The first page of text will carry the title *only*; the author's name should not appear on any pages of text.

(d) Please supply the article on paper of no less than 80 gsm weight with high quality print. This will enable electronic scanning if needed.

HEADINGS AND SUB-HEADINGS
Headings should be typed in capitals and underlined. They should come at roughly 750 word intervals, but this is only a general guide.

Sub-headings within the main headings should be typed in upper and lower case, and underlined.

CITATIONS AND REFERENCES
All citations should appear in the text in the form: Brown (1971), i.e. by author's surname and year of publication. References should be listed alphabetically at the end of the paper in the following form:

(a) Books:
Surname, Initials, Year of publication, *Title*, Publisher, Place of publication.
Example:
Czinkota, M.R. (1989), *International Business*, Dryden Press, Chicago, IL.

(b) Articles:
Surname, Initials, Year, "Title", *Journal*, Volume Number, pages.
Example:
Bilkey, W.J. (1985), "Development of export marketing guidelines", *International Marketing Review*, Vol. 2 No. 1, pp. 31-40.

Footnotes must be numbered consecutively througout the article. Where publications are mentioned in footnotes, their titles should be in upper and lower case and underlined.

CHARTS, DIAGRAMS AND FIGURES
Charts, diagrams and figures should be numbered consecutively and in any event called figures. Every figure must have a number in arabic numerals, a brief title, and labelled axes. Indicate in the text where you wish the figure to appear. Send good artwork.

TABLES
Tables should be numbered consecutively and independently of any figures you may include. Each table must have a number in roman numerals, a brief title, and headings down and across. Indicate in the text where you wish the tables to appear. Type tables on separate sheets of paper: do not include them in the main body of the text.

ABSTRACTS
Authors are requested to supply an abstract of about 150 words when submitting an article. It should be an abbreviated, accurate representation of the contents of the article. Major results, conclusions and/or recommendations should be given, followed by supporting details of method, scope or purpose, as necessary. It should contain sufficient information to enable readers to decide whether they should obtain and read the entire article.

KEYWORDS
Authors should also provide 1-6 keywords or descriptors that clearly describe the subject matter of the article. These terms have two purposes: to help describe the subject content of an article to prospective readers; to index the article for retrieval from a database or bibliography. Such keywords might include:

- *Country, geographical area*, e.g. Africa, Sweden, Developing countries
- *Industry*, e.g. Banking, Aircraft industry
- *Organization/organization-related*, e.g. Small business, Multinational, Corporate image
- *Broad functions*, e.g. Marketing, Production management
- *Specific functions*, e.g. Sales promotion, Scheduling
- *Management and managerial activities*, e.g. Matrix management, Policy making, Decision making

Not all of these aspects will be applicable to a particular article. Some articles will require more terms than others.

THE REVIEWING PROCESS
Each paper submitted to *EJM* is subject to the following review procedures:

(1) It is reviewed by the editor for general suitability for this publication.

(2) If it is judged suitable, two reviewers are selected and a double blind review process takes place.

(3) Based on the recommendations of the reviewers, the editor then decides whether the particular article should be accepted as it is, revised or rejected.

The process described above is a general one. The editor, however, may, in some circumstances, vary this process.

MANUSCRIPTS
All manuscripts should be sent to Professor David J. Carson, School of Management, University of Ulster, Shore Road, Newtownabbey, Co. Antrim, BT37 0QB.

SUBMISSION OF DISKS
Once an article has been accepted for inclusion within the journal, disks should be supplied with manuscript whenever possible. Contributors in a position to comply with this request should submit any 3½" disk prepared on a PC or Macintosh system in ASCII format.
